Title of the invention
Method for vacuum skin packaging

Field of the utility model

This invention relates to a packaging method for vacuum skin packaging by providing a heating device at the downstream of a vacuum packaging machine of a form fill seal type using a plastic film as a packaging material.

*****omitted*****

An object of this invention is to provide a film shrinkage device for a vacuum packaging apparatus capable of producing a package having an appealing appearance without crease.

*****omitted*****

The inventor found that the above object can be achieved by providing a heating device 5 which locally heats a product 2 from its side at the down stream process of the continuous vacuum packaging machine as shown in Figs. 2 and 3.
